**13 - General Comments regarding this delivery mode (e.g. Classroom, Online, EagleVision, etc.):**

**Response Rate** 3/17 (17.65%)

- The delivery mode can be very confusing to a new student.
- I was not a fan of the timed quizzes. I appreciated the ability to complete it a second time but sometimes the questions we received on the quiz did not completely reflect the problems we were given even in the MyStudyPlan. I think the program is very effective for the most part, but at time there did seem to be a disconnect between the quizzes and the content we studied. This was not every quiz, but several were extremely frustrating as I would complete all the MyStudyPlan areas for the quiz, only to see something that didn't seem to line up with what was discussed.
- The delivery method used for the discussion was awful, it felt like a competition to see who did the homework right with all the restrictions on chat like not seeing anyone's work until you've posted your own or not being able to edit your own post. The request for meaningful responses to math questions while i see the point from a communication stand point i see no other practical application unless the student got the question wrong. I viewed the discussions in another class as a way to communicate with fellow class mates and learn from different perspectives and i liked that approach, but the discussion here was not at all a cooperative sense it was us grading each others work while revisiting our math videos.

----------------------	---------------

- This course confused me a great deal and I truly struggled with a majority of the assignments.
- There were a few discussion board instructions that were sometimes difficult to interpret. Mod 4 & 5 had a lot of material to cover
- I felt like it was somewhat easy up until Module 7, and then got significantly harder. Sometimes I wished things were better explained in the textbook, but I was able to use the YouTube videos provided or the tutoring function to fill the gap. I do think this class could be improved by a more personable interaction with the teacher - maybe a weekly video describing any tips/tricks that may be applicable just to put a name to the face and get a feel for his personality. I had a generally pleasant (as pleasant as 15+ hours of math a week can be) experience and look forward to taking my next class.
- The entire class could be taught to anyone with the same list of YouTube videos used. There is very little need to do anything with any textbook or any ERAU feature with this class.
