| <ul style="list-style-type: none"> <li>First of all I'd like to state that having essay assignments in a math class seems a little bit too much. These assignments seemed to distract from actual learning of a topic as in depth as Calculus. I also felt the content seemed excessive in amount for a short week of completion in each Module. I never felt as if I had enough time to fully comprehend all the requirements of each module. Also, the tests and homework as well the mid term and final contained information not specifically emphasized in the course content.</li> <li>Easy to use and understand</li> </ul> |             |

| <ul style="list-style-type: none"> <li>• There was just too much expected in such a short amount of time. The text book to me was worthless. The YouTube videos really helped.</li> <li>• The only gripe I have against the course, is the limited amount of questions on the test. Since partial credit is not given to answers with minor flaws, missing one or two questions is easier and has a heavier impact on the overall score. If there were a few more questions, it would provide more reasonable room for mistakes.</li> <li>• I feel that my comments so far would be clear that I think this course needs to be re-evaluated for the time frame and content throughout a nine week term. I felt like I just made it through but never really solidified any learnings. I did learn a significant amount about Pre-Calculus but never felt satisfied with the results.</li> <li>• Will continue to help as I work through my career field. Was able to identify several real world applications.</li> </ul> |               |
