<ul style="list-style-type: none"> • thank you for your efforts to check the "Show work" on exams • He had timely and direct answers to my questions on personal email and gave clear and concise directions in the course work. • Professor Chamberlain always got back to me if I had a question and was timely about grading. • I used to feel like I sucked at math, but Professor Chamberlain really helped me kick that feeling through timely feedback on quizzes and assignments, and relatable discussion questions. Thanks for a great term! • Response time to questions asked were extremely quick and greatly appreciated. All comments given by the professor were helpful for me to achieve a better result. I would definitely consider another course with Prof Chamberlain. • The organization of his syllabus and homework instructions could use an overhaul. You could argue that it's disorganized on purpose, but I found it very unhelpful. As someone with a fulltime job and taking two classes I rely heavily on the video instructions provided and the last section was lacking. Please add more, for the sake of consistency, at least. • Very precise in his work. Great instructor.

<ul style="list-style-type: none"> Math in general is not the easiest thing to learn online from my experiences. Recommend mixed media throughout the course for a better understanding vs reading a text book and then attempting to try. In previous classes, I've found it easier to be explained then shown how to work a problem then attempt the problems. As independent learner, the online option is perfect. This was my first time ever taking an online class, but it was definitely structured in a way that helped me learn the material.

<ul style="list-style-type: none"> Definitely a great math course to take. Challenging, but the Professor offered support. in my opinion, the class is a little intense for the number of subjects that are covered, and the time that is given on the quizzes is barely enough time to even work the problems out without messing up. I feel the course was quite loaded for the first three weeks and could be spread out to assist students understanding of new concepts. I also feel the discussions detracted from my actual study time as I was trying to find a solution to the questions and submit before the 4th day. Another contributor to unnecessary stress was unannounced downtime with MyLab, the site was down a couple of times on a weekend when I had planned to take an exam. For me the weekend (Friday and Saturday) is the most convenient time to take the exams, an improvement I would like to have seen was notifications when MyLab is down prior to the day.
