25 - General comments regarding this course:

Response Rate 2/29 (6.9%)

- It would help if our professor could make weekly lectures for the class. It would bring a greater understanding of math. Just because it is online doesn't mean we shouldn't get instruction from our professor.
- This class relies heavily on third parties such as My Math Lab and YouTube to teach rather than Embry Riddle. My math lab is very inconsistent and has the following issues. -Rounding through out the course is inconsistent on My Math Lab in both practice and skills check for final answers -My Math Lab is inconsistent with rounding during steps of problems as well -My math Lab examples often don't show enough steps and even have typos with numbers. Over all the course was a let down and many of the students feel that this course is self taught. Most of these concepts I had to find other sources to learn the material as the class resources did not provide enough. Honestly, for the expense of my math lab I expected a better product.

26 - Rate this instructor's overall teaching effectiveness:
