

ERAU Service

I have engaged in varied, sustained, and progressive levels of service at ERAU. At the university level, I was chair of the ERAU-WW Faculty Senate Academic Technology Committee from 2022-2025. This allowed me to build collegial relationships with faculty outside of my college such as with Brent Terwilliger (COA) who I eventually submitted an NSF grant with. It also allowed me to directly interact with university initiatives as an expert in educational technology, such as participating in the hiring of a Director of IT Service Management & Worldwide IT Service as well as the ERAU-WW End-of-Course Faculty Survey committee to focus student evaluation questions.

At the college level, I served on the Faculty Council from 2022-2023, leaving after accepting the Associate Department Chair role in February 2023. During my short tenure on Faculty Council, I assisted Alex Rister in initiating a Faculty Council Collegiality Award to address faculty concerns on receiving a collegiality award from administration. I also volunteered to lead the Fall 2025 efforts to revise the Faculty Council charter after faculty voted to temporarily suspend the council. These efforts led to a successful restart of Faculty Council in January 2026. In addition, I created and maintained a Faculty Activity Reporting system on behalf of the college. This system allowed for ease of faculty submitting their activity to a single location and automated, formatted reporting of faculty activity for efficient monthly and bi-yearly reporting. I met with representatives of both College of Aviation (Kimberly Luthi) and College of Business (Maria Petrescu) to discuss how they could implement a similar system, and the new Watermark activity reporting was partially modeled after my Faculty Reporting system. These efforts illustrate sustained and impactful service to COAS.

At the department level, I have sustained high-level leadership since accepting the Associate Department Chair role in February 2023. As Associate Department Chair, I performed all tasks expected of me as well as used my expertise in data science to improve admin efficiencies. For example, course monitors in the department asked for lists of instructors teaching courses they were monitors for by term and I created programming scripts to create such lists from raw Campus Solutions reports. In addition, course monitors asked for a yearly accumulation of end-of-course evaluations for courses they monitored, which I created programming scripts to provide. After the department chair hiring failed in January 2024, I accepted being Acting Department Chair (while still being Associate Department Chair) until another hiring cycle could be completed successfully. I stayed on as Associate Department Chair for another year to assist the newly hired chair, Tim Smith, and passed on the role in order to start as the Program Chair for the new Bachelor in Data Science in August 2025. The first year of the program saw major success and had 54 declared students by August 2026. During these years of administrative service I continually shifted the courses I was mentor for as the Department of Mathematics, Science, and Technology had heavy faculty turnover. I chaired one tenure-track candidate search in Physical Science in 2024-2025 while participating as a member in three other candidate searches: tenured candidate in Computer/Data Science in 2026, tenured department chair in 2024, and tenure-track candidate in Data Science in 2022-2023.

Associate Department Chair and Acting Department Chair

Chair of Academic Technology Committee ERAU-WW Faculty Senate

Participated in the systematic review of various end-of-course evaluation vendors. Interviewed incoming Director of IT Service Management & Worldwide IT Services

Program Chair BSDS, MADS

Attended COAS program meetings, advertised for minors, and answered any minor questions such as course equivalencies. Led development of Applied Data Science minor and one of its required courses (CSCI 251). Took over the minor after the sudden departure of Anastasia Angelopoulou.

Hiring Committee Chair and Member

- **Hiring Committee Chair** for Department of Mathematics, Science, and Technology tenure-track candidate in Physical Science (2024–2025).

Organized committee meetings, provided initial review of all candidate qualifications, organized application packets, met with all 1st and 2nd waves of candidates, and contacted all references.

- **Hiring Committee Member** for 3 searches for Department of Mathematics, Science, and Technology: tenured candidate in Computer/Data Science (2026), tenured Department Chair (2024), and tenure-track candidate in Data Science (2022–2023). *Read application packets, met with all 1st and 2nd waves of candidates, contacted all references (tenured Department Chair search only), and provided evaluation for final recommendation to dean.*

Professional Society Service

[summarize all service, then detail the two below] - **Journal Reviewer** for *Frontiers in Psychology* (2026–present), *Scatterplot* (2025–present), *International Journal of Innovative Science and Modern Engineering* (2024–present), *Educational Studies in Mathematics* (2022–present), *Mathematical Thinking and Learning* (2021–present), *International Journal of Research in Mathematics Education* (2020–present), *Journal of Assessment in Higher Education* (2019–present), *Journal of Mathematical Behavior* (2017–present), and *Problems, Resources, and Issues in Mathematics Undergraduate Studies* (2017–present). *Completed approximately 5 reviews per academic year in the fields of Mathematics Education and Educational Data Science.*

- **NSF Grant Reviewer** panelist for National Science Foundation grant panels, 2022–present.

Find email from Vilma and include Cog Psych email stating “due to your paper”.

Mathematical Association of America (MAA)

- **MAA Council Member** for Mathematical Association of America Council on Teaching and Learning, 2022–present.

Provide updates and guidance for national society Mathematical Association of America. Represent interests on technology in undergraduate mathematics education.

- **MAA committee member** for Mathematical Association of America Committee for Teaching in Undergraduate Mathematics (CTUM), 2023–present.

Stimulate evidence-based effective and equitable teaching, learning, and assessment in undergraduate education in the mathematical sciences.

- **MAA Subcommittee Chair** for Mathematical Association of America Subcommittee on Technologies in Mathematics Education (STME), 2022–present. Member only 2021–2022.

Organized activities to update college-level math educators on most recent developments in technology for undergraduate mathematics education. Led bi-yearly meetings.

Include invitations to events: Gates Foundation dinner, Ice Cream event. Chair invitation for CTUM.

MAA Special Interest Group on Research in Undergraduate Mathematics Education (RUME)

- **RUME Committee Member** for the Special Interest Group of the Mathematical Association of America on Research in Undergraduate Mathematics Education (SIGMAA on RUME) for leadership nominations (2022–2026) and annual conference programming (2020–2022).
- Workshop on Technology in Math Ed yearly

SIGMAA on RUME is the premier national research group on college-level mathematics education. The annual conference programming committee provides additional reviews on potential conference proceedings and reviews all conflicting proceedings reviews. The leadership nominations committee solicits and evaluates

nominees for any open officer positions within the group. The committee then sends forward the final ballot of nominees to the RUME secretary for general voting.
